

## Environmental Policy Statement

AgilityEco provides a range of professional services to clients in both the public and private sectors. Our services are designed to help manage rising energy bills through energy efficiency initiatives. We offer clients bespoke delivery solutions including consultancy, project management, design, technical support, surveying, installation and regulatory compliance services.

As an organisation we recognise our responsibilities to the environment and are fully committed to continually reviewing and reducing our impact on the environment.

The organisation's arrangements for environmental management are to ensure compliance with both legislative and stakeholder requirements and for continual sustainable improvement which will be achieved by:

- > Documenting and communicating the latest applicable Environmental Legislation
- > Identification and communication of environmental aspects and any potential impacts to air, land and water
- > Ensuring environmental objectives meet best practice
- > Provision of training to all employees on environmental awareness to enable procedures and processes to be followed
- > Demonstrating senior management commitment to the environmental policy to enable a positive continually improving environmental culture to develop
- > Suitable selection, management, control and continual improvement of our personnel, materials and activities and utilisation of equipment and resources
- > Identification of our waste streams - eliminating, reusing or recycling where possible
- > Efficient use of energy and water resources within our business, especially travel
- > Effectively communicating this policy to all employees, major customers and other stakeholders

The organisation will review its environmental performance through senior management review meetings.

**Gearoid Lane**  
Chief Executive

**Jon Kimber**  
Managing Director
